## ON-DEMAND PROGRAMS

### **Bridging The Practice Gap: Integrating Guidelines and Clinical Trial Evidence Into Optimal Collaborative Care for Patients**

Presenter: Arunabh Talwar, MD,FCCP    Host:  
Barbara Capozzi, DO

5:00-5:30pm - Registration and Dinner

5:30-7:00pm - Program

Location:

Settepani Italian

196 Lenox Ave,

New York, NY 10026

<http://www.settepani.com/>

### **Educational Objectives**

This CME program is designed to improve competence, performance, and patient care practices by instructing clinicians in the highest quality of care for patients with Pulmonary Arterial Hypertension (PAH). At the conclusion of this program, participants will be able to:

- Accurately diagnose patients through comprehensive screening and early recognition of symptoms
- Evaluate the patient's condition and prescribe optimal long-term management, including knowing when and how to treat and when to consult with academic colleagues at an established PAH center

<http://www.phassociation.org/>

## Target Audience

This activity has been designed for pulmonologists, cardiologists, rheumatologists, internists, and primary care physicians, as well as nurses, physician assistants, and other allied health professionals who help care for patients with pulmonary arterial hypertension (PAH).

## Keynote Speaker

Keynote speaker Arunabh Talwar, MD, FCCP is a clinician who represents “**bridging the practice gap**” by using both his medical research and clinical knowledge to provide patient care. His specialties include advanced lung disease, interstitial lung disease and pulmonary arterial hypertension.

Aside from his 13 year tenure as Director of advanced lung disease and Pulmonary Hypertension Interstitial Lung disease at North Shore University Hospital in Long Island, Talwar is also a clinical scientist. As an Associate Investigator for the Center for Heart & Lung Research at the The Feinstein Institute for Medical Research, he works on translational research in pulmonary medicine with a focus on pulmonary hypertension and advanced

lung disease.

A three time recipient of the Empire Clinical Research Investigator Program (ECRIP) award, Dr. Talwar works to explore the various co-morbidities that affect patients with pulmonary hypertension and interstitial lung disease. By taking a close look at patient mental health and quality of life, his research provides a holistic approach to restorative medicine. Talwar has over 100 publications and more than 20 chapter books on Pulmonary Arterial Hypertension.
